

Carbon Reduction Plan

The production of our Carbon Reduction Plan is currently under review.

Tripod Crest Group are a road planing & surfacing contractor which offers construction solutions to the residential, commercial, retail and highways sectors. As a group we are committed to achieving net-zero by 2040.

The group has a Carbon Reduction Plan in place covering the next 5 years. However we have taken further steps to align our business to the requirements of PPN 06/21. Subsequently we have engaged independent Carbon Reduction specialists to enhance our existing Carbon Reduction Plan.

Our business is currently within the 'measure' stage of the process collecting data which will enable 2021/22 to be our baseline year for change.

The updated Carbon Reduction Plan will be published on this website in September 2022.

Carbon Reduction Plan

Year 1	Title: Carbon Reduction Plan
	Description: Tripod Crest is committing by 30 th September 2022 of having a fully outlined Carbon Reduction Plan. So our teams can understand how to measure carbon management and then demonstrate how we will implement reductions within the delivery of the schemes. We will achieve this with help and guidance from industry leading carbon reduction specialists to cover all areas of our business, to align us with PPN 06/21
	Specific: having a fully outlined Carbon Reduction Plan.
	Measurable: alignment with PPN 06/21
	Achievable: We will achieve this with help and guidance from industry leading carbon reduction specialists
	Relevant: understand how to measure carbon management and then demonstrate how we will implement reductions
	Timebound: September 2022
Year 2	Title: 100% Carbon Neutral Electric
	Description: We commit to only use electricity supplied via a 100% certified renewables tariff within 2 years, across all our depots and offices. Neutralizing our offices electricity supply to carbon zero status, verifiable by organizations such as the Carbon Trust to give us confidence in our renewable status.
	Specific: we commit to only use electricity supplied via a 100% certified renewables tariff
	Measurable: 100% certified renewables tariff, carbon zero status
	Achievable: verifiable by organizations such as the Carbon Trust
	Relevant: Neutralizing our offices electricity supply to carbon zero status
	Timebound: within 2 years (2025)
Year 3	Title: Euro 6 fleet or Higher
	Description: To continually demonstrate our commitment to our businesses reduction in carbon and in line with our Workshop and Transport Managers renewal schedules for all vehicles and plant within our fleet. We commit that by the end of 2024 all our vehicles and equipment will be a minimum standard of Euro 6 or higher equivalent standards.
	Specific: all our vehicles and equipment will be a minimum standard of Euro 6 or higher equivalent standards.
	Measurable: all our vehicles and equipment will be a minimum standard of Euro 6 or higher equivalent standards.
	Achievable: in line with our Workshop and Transport Managers renewal schedules
	Relevant: continually demonstrate our commitment to our businesses reduction in carbon
Timebound: by the end of the 2024	
Year 4	Title: Low Carbon Alternative Fuels
	Description: We have established that within our plant and vehicles we can use HVO and GTL carbon emitting reduction fuels, without compromising the warranty, efficiency or performance of our vehicles and equipment. We are committing that by 2025 Tripod Crest will be using alternative fuels within our vehicles and equipment. Having a dedicated, system monitored fuel tank at our depot supplied by local stockiest of HVO or GTL fuels.

	<p>Specific: within our plant and vehicles we can use HVO and GTL carbon emitting reduction fuels</p> <p>Measurable: Having a dedicated, system monitored fuel tank at our depot</p> <p>Achievable: supplied by local stockiest of HVO or GTL fuels.</p> <p>Relevant: HVO and GTL carbon emitting reduction fuels,</p> <p>Timebound: by 2025</p>
Year 5	<p>Title: Carbon Offsetting</p> <p>Description: Within 5 years we commit to plant 1 tree per month for every Tripod Crest employee, achieved though collaboration with organizations dedicating to carbon offsetting and conservation. Based on 150 staff, equating to 1800 trees planted per year, offsetting 9000 tonnes of CO2 over the duration of the PDF.</p> <p>Specific: plant 1 tree per month for every Tripod Crest employee</p> <p>Measurable: 150 staff, equating to 1800 trees planted per year, offsetting 9000 tonnes</p> <p>Achievable: though collaboration with organizations dedicating to carbon offsetting and conservation.</p> <p>Relevant: offsetting 9000 tonnes of CO2</p> <p>Timebound: by 2027</p>
